

Super Slim & Smallest

The world's slimmest & smallest dual polarization antenna

Intense Signal Reception

Small size & extremely slim but high performance

Intelligent Performance

Support Ku-band channels reception of major satellites

Featherlight

Surprisingly lighter than conventional dish

Dual Linear Polarization **SELSAT**TM
Flat Satellite Antenna
SELSAT-H30D Series

Super Slim & Smallest

The world's slimmest & smallest dual polarization antenna

Various choice

Can choose Single/Twin/Quad output LNB model

Normal Parabolic Antenna

SEFLSAT H30D Series Antenna

600mm × 600mm × 500mm

547mm × 277mm × 58mm

SINGLE LNB

TWIN LNB

QUAD LNB

Choice!

Easy installation

Can install antenna and adjust angles by well-engineered bracket supplied as a basic package.

Wall Mount

Clamp Mount

Azimuth control

Elevation control

Skew control

Specification

Model Name	SEFLSAT-H30D / H30D2 / H30D4
Input Satellite Frequency	10.7~12.75GHz
Polarization	Vertical & Horizontal
Antenna Gain	33.7 dBi @ 12.7GHz
Size(WxDxH)	517mm × 277mm × 58mm
Weight	4.5kg
Current Consumption	150mA (max)
Operating Temperature	-30°C to + 60°C
Storage Temperature	-40°C to + 80°C
LNB output	1 / 2 / 4 output LNB
LNB output Frequency	950~1,950MHz / 1,100~2,150MHz
L.O. Frequency	9.75GHz / 10.6GHz
LNB Noise Figure at 25°C	0.2 dB Typical
Conversion Gain	60 dB Typical
